

TraxNYC printable ring sizer

Print this page at 100 percent (Actual size), never Fit to page. Then check the print against the card box and the bar.
If a bank card does not fit the box exactly, or the bar is not 50 mm on a ruler, the print is scaled: print again at 100 percent.

A bank card fits this box exactly.

Lay any card here. Its edges should meet these lines all the way round.

85.6 x 54 mm

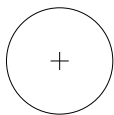

This bar measures 50 mm on a ruler.

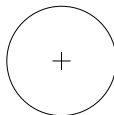

Millimetres marked every 5 mm.

Way 1: match a ring that already fits

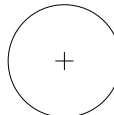

Lay the ring flat on the circles. Your size is the circle whose line just shows inside the ring, not under the metal.

Way 2: measure the finger

Cut out the strip. Wrap it around the base of the finger, snug over the knuckle, and read the size where the end meets the marks.

Between two sizes, take the larger: a knuckle needs room, and fingers swell in the heat and late in the day.

A wide band wears tighter than a thin one of the same size, so for 6 mm and wider, go up a quarter to a half size.

Measure warm fingers at the end of the day. Questions or your size: text the desk at 212-872-9692, or open the live chat.
